

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

5 Claim 1 (canceled).

 Claim 2 (new): A method for outputting help information on a mobile radio device in which context-related help information for operation and input functions is stored, the method comprising:

10 receiving a request for help information;
 outputting help information with acoustic output and one or more signaling buttons.

 Claim 3 (new): A method as defined in claim 2, wherein outputting
15 help information by one or more signaling buttons includes one or more of illuminating the signaling buttons at an illumination level different from other buttons, repeated illumination of one or more buttons, switching off illumination of buttons not involving in signaling.

20 Claim 4 (new): A method as defined in claim 2, wherein acoustic output includes voice output of a help text via a speaker in the mobile radio device.
